<b>For Use With</b>	All	Existing CPFs	All	All	All	All	All	All	People	Corporate Bodies	All	All	All	All	All
<b>OR Transformations Required</b>			To strip quotes, use this GREL expression: value smartSplit(";", join(" "))		Transpose cells across columns into rows. 2 columns (key: Date Type; value: Date). Then replace field names with "Birth", "Death", or "Active"	Use this GREL expression: value smartSplit(";", join(" ")), then split multi-valued cells on separator #	Use the GREL expression: value smartSplit(";", join(" ")), then split multi-valued cells on separator #	Facet to rows containing values in Place field, then add column based on Place column with "AssociatedPlace", then clear facet	Use this GREL expression: value smartSplit(";", join(" ")), then split multi-valued cells on separator #	Use this GREL expression: value smartSplit(";", join(" ")), then split multi-valued cells on separator #		Transpose cells across columns into rows. 1 column (shouldn't need key column since URLs are unique)			
<b>Ordering of actions</b>								After transforming Place field							
<b>Manual Transformations Required</b>													Create citations properly formatted for non-Airwaves material		
<b>Example 1</b>	person	2781483	WCAU-TV (Television Station - Philadelphia, Penn.)	1932-03-15	Active	Radio stations	Alabama		Radio Executive	Radio station	<p>This is a biogHist note. <p>-citation>This is a citation-</citation>	<a href="https://viaf.org/viaf/110258866">https://viaf.org/viaf/110258866</a>			
<b>Example 2</b>	corporateBody	3321515	Press. O. Leonard	1956	Birth				Broadcasters	Universities		<a href="https://www.wikidata.org/wiki/Q8000236">https://www.wikidata.org/wiki/Q8000236</a>			
<b>Example 3</b>		9501	Duquesne University	1968-09	Death		Washington (D.C.)		Consultant	Law firm		<a href="https://id.loc.gov/authorities/n79132416">https://id.loc.gov/authorities/n79132416</a>			
<b>Notes</b>			Formatting in Airwaves is aligned with SNAC preferred formatting--if entity has LCNAF entry, that formatting can be used and seems to be SNAC aligned as well	All date formats will upload exactly as submitted, no need for reformatting		SNAC now uses FAST-aligned headings, so there should be no subordination-type-coordination of subject terms. E.g., no "~~" between terms	Do not use commas when adding places in Airtable; should be RDA-compliant format				If < citation> tag is put outside of the last <p> tag for the biogHist, it will break it into a separate paragraph on SNAC	According to past examples from SNAC, only URL column is required, not a key column that indicates what the external source is	One citation per CPF right now given Airtable constraints and possible SNAC OR extension constraints	One citation per CPF right now given Airtable constraints and possible SNAC OR extension constraints	One citation per CPF right now given Airtable constraints and possible SNAC OR extension constraints

Related Fields								
For Use With	All	All	All	All	All	All	All	All
OR Transformations Required		Airwaves: Fill all rows with DigitalArchivalResource				Airwaves: add labels to numbers using facets and transform		Airwaves: Fill all rows with MITH SNAC ID; BAVD: Fill each collection with appropriate HR ID
Manual Tranformations Required								
Example 1		DigitalArchivalResource	National Association of Educational Broadcasters (NAEB) audio tapes   National Educational Radio Network Broadcasts, 1952-1973   Listen America		1961 to 1964 correspondence with publications editor Betty McKenzie regarding the NAEB Journal's authors, articles, mailing, printing, and ads.	29 digital audio files		84714162
Example 2		ArchivalResource	National Association of Educational Broadcasters Records, 1925-1977 (bulk 1950-1970)   Board of Directors, Correspondence, 1954 (Box 20, Folder 1)		Interview series on variety of science-related subjects, produced by the California Institute of Technology. Features three Cal Tech faculty members: Dr. Peter Lissaman, Dr. Albert R. Hibbs, and Dr. Robert Meghreblian.	1 audio recording		
Example 3						5 digital page scans		
Notes	Generated by adding resources	Probably shouldn't be DigitalArchivalResource for un-digitized WHA-- just "ArchivalResource" instead			Descriptions only for NAEB collection--unsure about data quality on other collections and easier to leave abstract off entirely			Airwaves stays attributed to MITH because it is a MITH site, other collections to be attributed to their appropriate holding repositories
Release v1.0.0-beta-18
